

Diacritics for PCs

Instructions: If the keys are separated by a plus (+) sign, press them all in unison to get the desired character. If the two sets of images are separated by a comma (,) press the first set in unison, then press the second set in unison. If a set of keys is contained within brackets, press and hold the key immediately preceding the open bracket while typing the keys shown within the brackets.

Additionally, you must use the number pad on your keyboard for the diacritics to work. Using the number keys located above the letter keys will not work.

Left-pointing guillemet:	«		+	[	,		,	]
